

El Camino College
COURSE OUTLINE OF RECORD – Official

Subject:	RC
Course Number:	BSRC 483
Descriptive Title:	Case Management in Chronic Pulmonary Disease
Division:	Health Sciences and Athletics
Department:	Respiratory Care
Course Disciplines:	Respiratory Technologies
Catalog Description:	This course provides an opportunity to share chronic pulmonary disease experience with other professionals that have particular importance for Respiratory Care Practitioners. The sharing will be in the form of a solution for a case study of a problem in chronic pulmonary disease focusing on respiratory care solutions. Solutions will include evidence-based medicine justifications as well as personnel management and any budgetary concerns. The solutions provided by the students highlight challenges faced in delivering care and provide a mechanism for frontline clinicians to engage with others who may have had similar experiences.
Prerequisite:	Admission to El Camino College Respiratory Care BS Program Eligibility for RCP license in California: 1. Graduation from a CoARC accredited Respiratory Care Program 2. A.S. degree from an accredited Community College 3. Completion of the 39 required CSU-GE Transfer Pattern units (IGETC)
Co-requisite:	
Recommended Preparation:	
Enrollment Limitation:	
Hours Lecture (per week):	4
Hours Laboratory (per week):	0
Outside Study Hours:	8
Total Course Hours:	72
Course Units:	4
Grading Method:	Letter Grade only
Credit Status:	Credit, degree applicable

Student Learning Outcomes:	<p>SLO #1 Critical Care</p> <p>Demonstrate organizational and developmental skills when designing the final assignment formulating an evaluation of components of critical care related to cardio-pulmonary issues and the respiratory care practitioner's scope of practice utilizing advanced diagnostic techniques in chronic pulmonary disease cases.</p> <p>SLO #2 Research Skills</p> <p>Integrate the broad range of research skills learned across the curriculum to analyze the role of pharmaceuticals, pharmacokinetics, and pharmacodynamics in treating a respiratory care in chronic pulmonary disease.</p> <p>SLO #3 EBM Data Analysis</p> <p>Completion of the final assignment using the methodological approach, collection, measurement, and evidence based medical data analysis.</p>
Course Objectives:	<ol style="list-style-type: none"> 1. Examine chronic pulmonary diseases and their processes. 2. Analyze the impact of chronic pulmonary diseases on respiratory care departments. 3. Develop treatment plans for chronic pulmonary diseases using evidence-based medicine.
Major Topics:	<p>I. Disease Processes/Chronic Pulmonary Diseases (24 hours, lecture)</p> <p>A. Adult</p> <ol style="list-style-type: none"> 1. Current accepted treatment modalities 2. Standard of practice in special circumstances 3. Reported patient preferences <p>B. Infant</p> <ol style="list-style-type: none"> 1. Current accepted treatment modalities 2. Standard of practice in special circumstances 3. Reported patient preferences <p>II. Chronic Pulmonary Diseases/Respiratory Care Department (24 hours, lecture)</p> <p>A. Personnel management</p> <ol style="list-style-type: none"> 1. Patient/practitioner ratios 2. Current staffing rubrics 3. Policy review concerning staff workload <p>B. Funding allocation</p> <ol style="list-style-type: none"> 1. Emergency staffing funding allocation review 2. Departmental vs. Hospital funding allocation review

	III. Treatment Plans for Chronic Pulmonary Diseases (24 hours, lecture) A. Emergency Department 1. Evidence-based medicine justification 2. Managerial issues and solutions B. Out-patient Clinic 1. Evidence-based medicine justification 2. Managerial issues and solutions
Total Lecture Hours:	72
Total Laboratory Hours:	0
Total Hours:	72
Primary Method of Evaluation:	1) Substantial writing assignments
Typical Assignment Using Primary Method of Evaluation:	Research long-term management of chronic pulmonary disease patients and develop a hospital plan that includes treatment plan, staffing, and funding portions. Your plan must include justification for each portion of your plan based on the evidence found in your research.
Critical Thinking Assignment 1:	Examine current personnel management models of personnel and funding allocation in respiratory care departments for issues such as a rise in asthma exacerbations and develop a budget to handle this situation as if it was going to last an entire fiscal year.
Critical Thinking Assignment 2:	Analyze your hospital plan for chronic pulmonary disease patients requiring follow-ups and based on research of evidence-based medicine, develop your own plan with justification from your research. If your plan is the same as your hospital plan, then provide justification for each portion of the plan.
Other Evaluation Methods:	Reading Reports, Term or Other Papers, Written Homework
If Other:	
Instructional Methods:	Discussion, Lecture, Multimedia presentations
If other:	
Work Outside of Class:	Problem solving activity, Required reading, Study, Written work (such as essay/composition/report/analysis/research)
If Other:	
Up-To-Date Representative Textbooks:	Heather R. Hall. <u>Evidence-Based Practice: An Integrative Approach to research, Administration, and Practice</u> . 3 rd ed. Jones & Bartlett Learning, 2020 Michael Glass. <u>Pulmonary Medicine: An Evidence Based Approach</u> . American Medical Publishers, 2022
