

English and Mathematics Placement Survey

Students in Grades 11-12 can complete the *English and Mathematics Placement Survey* in MyECC to receive **math placement** on their El Camino student account (up to MATH 190).

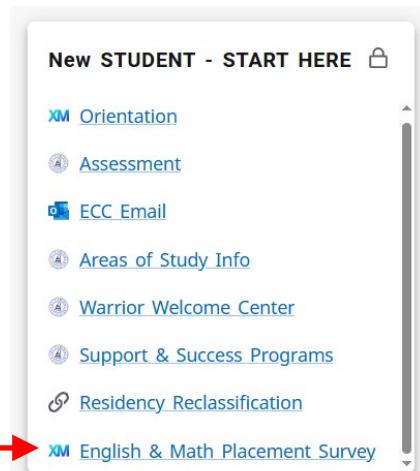

Students in Grade 12 can also receive **English placement** from this survey.

This survey can be submitted multiple times to update your placements.

1. Sign into [MyECC](#)
2. On the **New STUDENT - START HERE** card, click [English & Math Placement Survey](#)
3. **Answer the questions carefully based on when you plan to enroll in El Camino College classes.** This means projecting ahead to when classes begin.

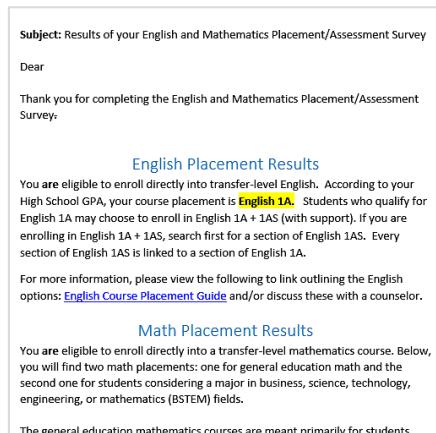

For example: if you are a current 10th grade sophomore completing steps to dual enroll in a class offered during next summer or fall after you have completed 10th grade, you would answer that “the highest high school grade level you will have completed *or will be in*” is **“11th (Junior Year)”**

Also make sure to indicate the highest English and math classes you *will have* completed, and estimate your final grade and GPA if these are still in progress.

After submitting the survey, you will see a summary of your responses.

Within **1-2 business days** (usually overnight) placements will be added to your El Camino student account to allow you to register. An email with your Placement Results will also be sent to **your @elcamino.edu email address**.

NOTE: Students must indicate they will have completed 3 years of high school in the United States to receive English placement. (Otherwise, complete this [Supplemental English Placement Form](#) instead.)
