Spring 2001 Parking Update

There have been more problems with parking during the days than the evenings this semester. Parking reached its capacity during the day between the hours of 9:30 am to 12 noon, which is the crunch period. During the first three weeks of the semester students were allowed to park in areas (tree line, red zones, up to curb lines), which are not authorized for parking during the semester. This semester was the least congested at the of the semester.

3/12 Dispatcher Schedule

The dispatchers at the police department have expressed a desire to work the 3/12 plan. When a dispatcher is on vacation that shift is filled by another dispatcher who ends up working a 12-hour shift. Changing to this schedule will reduce overtime. The police department has lost dispatchers to other agencies who have the 3/12 plan. It is subject to negotiations.

Emergency Telephone Project Update

The second phase of replacement of the old emergency phones and installation of the new phones will begin within the next 60 days. Appreciation was expressed to Mr. Bob Gann and his staff for replacing the phones. Approximately nine smaller emergency telephone units will be installed at designated locations.

Emergency Operations Vehicle Update

The 1986 Chevy van, which was given to the District at no charge from the federal government, has been fitted with emergency equipment and will be used as the District's emergency operations vehicle during a disaster. The police department is also working with an Academic Senate member who is a ham operator.

New Parking Permit Machines

New parking permit machines were installed at various locations around the campus. The machines can be programmed with up to five multi-language screens, accept \$5 bills, and gives change. The goal is to replace the older machines at three machines per year.

Mr. Middleton expressed his appreciation for the assistance he received from campus police during an incident that occurred in his office.
